### WHS Experience

Our 9<sup>th</sup> graders attended a field trip to Weber High School. Exploring the possibilities of classes, clubs, and a larger student body, instigated dreaming of their future.

9<sup>th</sup> graders had a great time on their fieldtrip to **OTEC**. The presentations and classes were interactive, drawing in the attention of the students.

Ages 13-14

< “Enchanting Tiger” >  
by Zoe Markiewicz, United States

One day after school I was thinking of ideas for this contest, and I thought of a tiger and sketched it out. From that original sketch to now, many things have changed. I love doing art, and it was really neat to try this out especially since I learned so much about graphing!

<https://www.desmos.com/art#13>

Each year the online graphing company of Desmos puts on a contest for graphic design and art. In 2022, there were thousands of submissions worldwide. For the age group of 13-14 years old there was a Top 20 selected and highlighted from the competition. We need to point out and recognize that our very own **Zoe Markiewicz** won a Top 20 nomination and is being represented on the link below for her piece titled "Enchanting Tiger". When you open and explore each graph you can see that each line, mark, and shade is all made using linear and nonlinear functions.
